Sign up early and save!

Regular Registration AGD member: \$425

Regular Registration non-AGD member: \$550

Course Overview:

Innovations in digital dentistry and high-strength all-ceramic systems in conjunction with advanced CAD/CAM technology provide us with more opportunity to offer esthetic and function not only in the esthetic zone, but also in high stress posterior occlusion. Each system requires specific tooth preparation, laboratory communication, surface conditioning for luting. Current ceramic primers and luting cements have made these a reality.

All-Ceramic Restorations in 2020 is an in-depth look at concepts, procedures and products to enhance the durability of these restorations. Dr. Barghi will also examine the current status of the new monolithic zirconia restorations

This course is designed to provide participants with practical information on indications, selection, tooth preparation, laboratory communication and bonding of current types of all ceramic restorations in light of current scientific and clinical information. Failures of esthetic restorations and steps for intra-oral repairs will be discussed.

Speaker Bio:

Dr. Nassim Barghi is professor and the director of esthetic dentistry at the UT Health School of Dentistry at
